LUXSHIELD by Piavevetro is the first armoured glass with special synthetic shield as middle pane in a triple glazing. The advantages of this solution are:

- No delamination at all
- No risk of yellowing at all
- Low weight
- High thermal insulation
- High performance in solar control
- No scratches or aging of the syntetic shield
- Long lasting solution
- Customization in thickness, colours, performances
- Easy handling and installation
- All certifications available
- Short production time
- Easy to clean as a common glass (no synthetic material in the inner side)
- UV resistant and available for curtain walls also
- Case study for special requests
